EDUCATION

University of Calgary, Schulich School of Engineering
BSc. in Software Engineering

Graduation: May 2026

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, C#, Python, Java, C/C++, SQL

Tools & Frameworks: React, Next.js, Node.js, Expo, React Native, Tailwind CSS, Figma, MySQL, Jira, Git

EXPERIENCE

UI/UX Designer & Front-End Developer - *WealthPath, Enactus*

Nov. 2025 to May 2026

- Developed front-end features in **TypeScript** and **React** for a financial literacy platform
- Designed and iterated **UI/UX** solutions in **Figma**, conducting user research and collaborating cross-functionally to align decisions with technical requirements
- Collaborated with development teams via **GitHub** and **Agile sprints**, with task and bug management using **Jira**

Industrial Automation Intern - *CNRL*

Jan. 2024 to Dec. 2024

Kirby North, Lac La Biche, Alberta

- Developed **custom desktop applications** in **C#** using **Microsoft Visual Studio** and **SSMS** to streamline operational workflows and database management, improving process efficiency
 - DCS Alarm Application**: automated multi-criteria data input with filtering and generation of pre-populated Excel/Word reports, reducing manual process time by 40%-50%
 - Network Asset Management**: System to store and manage data for industrial assets (e.g., switches, VLANs, and devices) and their interconnections, refining asset tracking and assignment processes
- Observed on-site operator fieldwork and industrial machinery to gather data on network assets, guiding implementation of **data-driven software solutions** for workflow improvements

PROJECT-BASED EXPERIENCE

NAVIS – Smart Navigation Glasses | *ENEL 500 (Engineering Capstone)*

Fall 2025 to Winter 2026

- Designed and built a **React Native (Expo) + TypeScript** mobile companion app with **navigation SDK** and real-time **BLE connectivity**, testing firmware integration using an nRF52840 MCU
- Applied **Agile** methodology with bi-weekly sprint reviews & **Jira** task tracking across a multidisciplinary team

Cartify | *SENG 513 (Web-Based Systems)*

Fall 2025

- Designed and delivered a full-stack marketplace platform using **React**, **Node.js**, and **MySQL** to combine product trading and rentals into a single, cohesive experience while following WCAG accessibility standards
- Managed **GitLab** collaboration and led product design, delivering high-fidelity mobile & desktop prototypes in **Figma**

JS Custom Quiz | *SENG 513 (Web-Based Systems)*

Fall 2025

- Built an interactive quiz app in **JavaScript (ES6+)** with adaptive difficulty based on answer streaks, using an OOP Quiz Engine and fetching live questions from the Open Trivia DB REST API

Customer Churn Prediction | *ENSF 544 (Data Science)*

Winter 2025

- Built a machine learning pipeline to predict customer churn using Logistic Regression, SVM, and Random Forest models, achieving high accuracy in identifying at-risk customers to inform retention strategies
- Preprocessed and balanced datasets with pandas/NumPy before evaluating model performance

FanFest Expo | *CPSC 481 (Human-Computer Interaction I)*

Winter 2025

- Developed a responsive, cross-platform convention navigation system using **Next.js** and **CSS**, deployed via **Vercel**
- Designed high-fidelity desktop and mobile **Figma** prototypes following HCI principles and WCAG standards

Multi-Modal Authentication System | *ENCM 509 (Biometric Systems, Solo Project)*

Winter 2025

- Designed a multi-modal ML authentication system fusing facial and speech recognition to verify user identity, achieving 96%-98% accuracy
- Extracted facial features using **LBP + OpenCV** and audio features using **MFCC + GMM**, evaluating model performance via ROC curves, confusion matrices, and Matplotlib visualizations

LEADERSHIP ACTIVITIES

Vice President of Design

July 2025 to May 2026

TechStart UCalgary

- Led **design workshops** and provided guidance on **UI/UX** design principles, **prototyping**, and **usability testing** to help multidiscipline project teams deliver user-centered solutions

President

April 2025 to May 2026

Electrical and Software Engineering Students' Society

- Led a major engineering student society of **1,500+ students**, setting organizational strategy, managing multi-functional executive teams, facilitating corporate partnerships, and fostering an inclusive, engaged community
- Organized and executed professional development events including hackathon, career fair, and industry nights

UCalgary Head Delegate

Sept. 2025 to Feb. 2026

Canadian University Software Engineering Conference (CUSEC 2026) @ Montréal

- Part of the organizing team for a 3-day, 200+ attendee conference in Montréal, coordinating technical workshops, speaker sessions, and social events
- Led trip and conference logistics for the University of Calgary delegation of 17 students
